

- The Health Department would not recommend amending section 2.6 of the Site Plan Special Permit, application # 6/27/89 - 315 to allow the petitioner to store or change automobile fluids on site. The property is within a "Zone A" of MASSDEP's surface water supply protection areas, because of the proximity to Nagog Pond, which is a drinking water supply for the Town Of Concord.
- If Section 2.6 is amended to allow such activity, the Health Department would recommend the applicant submit supporting material as to why the site plan special permit should be amended. Also, if amended, the applicant must comply fully with the Town of Acton hazardous materials control bylaw.
